

Airport Air Quality Resource Library User Guide

The Airport Air Quality Resource Library is a website comprising reports, analytical tools, and guidance materials to help airports manage their air quality impacts.

Accessing the Library

The Airport Air Quality Resource Library can be accessed at <https://crp.trb.org/acrp0267/>.

While the Airport Air Quality Resource Library works most of the time in Internet Explorer, some users experienced difficulties accessing some content on this site. If you are experiencing such compatibility issues, please use a different browser to access the Airport Air Quality Resource Library, such as Google Chrome.

Searching for Resources

The Airport Air Quality Resource Library offers two ways to search for resources, by **keywords** or by **resource type**.

Option 1: Search by Keywords

Two Ways to Search

1) by Keywords

2) by Resource Type

To search by keyword, enter in a few words describing the resource(s) you are looking for. The more specific you are, the fewer results you will receive.

TRB's COOPERATIVE RESEARCH PROGRAMS

Attainment Area

- Attainment (10)
- Non-attainment & maintenance (21)

NEPA

Your search will generate a Results page. You can narrow down the results using the filters on the right side of the page.

Option 2: Search by Resource Type

To search by resource type, select from the available options. The library includes tools, standards, management approaches, requirements, permitting and compliance, guidance, and more.

The screenshot displays the "Airport Air Quality Resource Library" search results page. At the top, it identifies the program as "TRB'S COOPERATIVE RESEARCH PROGRAMS" and "ACRP WebResources". The search filters applied are "Tools", "Other", and "Greenhouse Gases". The results section shows three items:

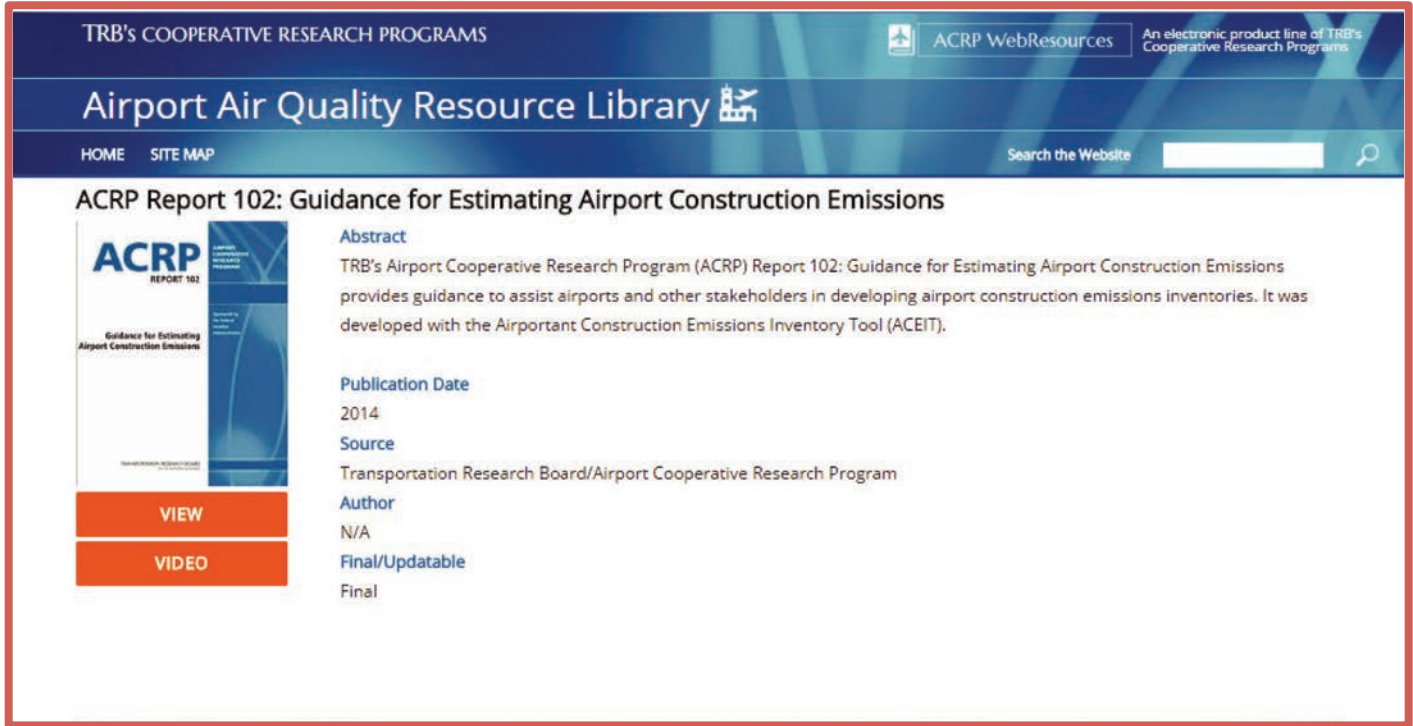

- ACRP Report 119: Prototype Airport Sustainability Rating System—Characteristics, Viability, and Implementation Options**
ACRP Report 119: Prototype Airport Sustainability Rating System—Characteristics, Viability, and Implementation Options identifies the features of a sustainability rating system specifically developed for airports, identifies...
- ACRP 02-30: Enhancing the Airport-Industry SAGA Website**
This is an active project to update to the SAGA website and database. There is increased attention and interest toward sustainable practices and incorporating them...
- ACRP Report 102: Guidance for Estimating Airport Construction Emissions**
TRB's Airport Cooperative Research Program (ACRP) Report 102: Guidance for Estimating Airport Construction Emissions provides guidance to assist airports and other stakeholders in developing airport...

The right sidebar contains a "CLEAR FILTERS" button and several filter categories with checkboxes and counts:

- Desired Detail**
 - Comprehensive (2)
 - Concise (1)
- Airport Size**
 - Large and Medium (3)
 - Small and GA (3)
- Resource Type**
 - Guidance (1)
 - Permitting and Compliance (1)
 - Tools (3)
- Health**
 - NA
- Regulatory Authority**
 - Other (3)
- Attainment Area**
 - Non-attainment & maintenance (1)
- NEPA**
 - NA
- Permitting / Regulations**
 - General Conformity (1)

Your search will generate a Results page. You can narrow down the results using the filters on the right side of the page. To see more results, you may select the “Clear Filters” button at the top of the filters panel or individually deselect filter options.

Accessing the Resource

The screenshot shows the website interface for the Airport Air Quality Resource Library. At the top, there is a navigation bar with "TRB'S COOPERATIVE RESEARCH PROGRAMS" on the left, "ACRP WebResources" in the center, and "An electronic product line of TRB's Cooperative Research Programs" on the right. Below this is a header for "Airport Air Quality Resource Library" with a search bar and "HOME SITE MAP" links. The main content area displays the title "ACRP Report 102: Guidance for Estimating Airport Construction Emissions". To the left of the text is a thumbnail image of the report cover, which includes the ACRP logo and the title. Below the thumbnail are two orange buttons labeled "VIEW" and "VIDEO". To the right of the thumbnail, the "Abstract" section states: "TRB's Airport Cooperative Research Program (ACRP) Report 102: Guidance for Estimating Airport Construction Emissions provides guidance to assist airports and other stakeholders in developing airport construction emissions inventories. It was developed with the Airport Construction Emissions Inventory Tool (ACEIT)." Below the abstract, the following metadata is listed: "Publication Date: 2014", "Source: Transportation Research Board/Airport Cooperative Research Program", "Author: N/A", and "Final/Updatable: Final".

Once you have found and selected a resource, you will be directed to a page with more information about the resource. To access it, select the “View” button under the preview image. If an instructional video has been made for the resource, the page will also contain a “Video” button.

Videos

The Airport Air Quality Resource Library contains instructional videos to enhance the use of air quality models. These videos can be found on the information page of the resource with which they are associated:

- Lead Emissions Inventory Analysis Tool (EIAT)—see *ACRP Report 133* information page.
- Airport Construction Emissions Inventory Tool (ACEIT)—see *ACRP Report 102* information page.
- ACI's Airport Carbon and Emissions Reporting Tool (ACERT)—see ACERT information page.
- Evaluation Process & Cost-Benefit Tool for Airport Sustainability Practices—see *ACRP Report 110* information page.
